1.		regard to the language, this opinion has been established on the basis of the international application in the language in which it was unless otherwise indicated under this item.
		This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under
	•	Rule 12.3 and 23.1(b)).
2.		regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed tion, this opinion has been established on the basis of:
	a.	type of material
		a sequence listing
		table(s) related to the sequence listing
	b.	format of material
		in written format
		in computer readable form
	c.	time of filing/furnishing
		contained in the international application as filed.
		filed together with the international application in computer readable form.
		furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Box No. IV Lack of unity of invention
In response to the invitation (Form PCT/ISA/206) to pay additional fees the applicant has: paid additional fees paid additional fees under protest
not paid additional fees 2. This Authority found that the requirement of unity of invention is not complied with and chose not to invite the applicant to pay additional fees.
 This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is complied with not complied with for the following reasons: The inventions of claims 1-34, 43, 44, 46, and 47 relate to tracking an object.
The inventions of claims 35-42 and 45 relate to correcting blurriness.
4. Consequently, this opinion has been established in respect of the following parts of the international application:

Document 3: JP 11-120364 A (Nippon Telegraph & Telephone Co. Ltd.), 30 April 1999, full text, all drawings

The inventions of claims 1, 2, 4, 5, 43, 46, and 47 do not appear to possess novelty or to involve an inventive step over document 1 cited in the ISR.

The inventions of claims 3 and 6 do not appear to involve an inventive step over documents 1-3 cited in the ISR.

Document 1 describes a device for continuing feature point tracing by resetting feature points again in a frame in which tracing was interrupted.

It would be easy for a person skilled in the art to use the constitution for judging that estimation is possible in a case in which certainty of estimation of a position is larger than a reference value as described in document 2 to the device in document 1.

It would be easy for a person skilled in the art to use the constitution for estimating a plurality of corresponding points as described in document 3 to the device in document 1.

The inventions of claims 7-42, 44, and 45 are neither described in any of the documents cited in the ISR, nor are they obvious to a person skilled in the art.

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

- 1. The description in claim 4 is unclear. Specifically, it is unclear how to "estimate the position of the second point," since it is "a case in which the estimation of the second point is impossible" in claim 4.
- 2. The description of claim 14 is unclear. Specifically, the constitution of the invention is unclear, as there is no description of a constitution "for selecting a second point based on the estimated point" in claim 14.
